

Safetech Innovations partners with Fidelis Cybersecurity

Bucharest, April 06, 2022 - Safetech Innovations (BVB: SAFE), a Romanian cybersecurity company listed on the AeRO market of the Bucharest Stock Exchange, today announces a significant partnership with Fidelis Cybersecurity, a US-based cybersecurity company focused on quickly detecting and responding to cyber threats and data breaches.

"We are thrilled to sign this partnership, as it represents a new stage in developing our portfolio of cybersecurity solutions and services. Fidelis is a leading global provider of state-of-the-art extended detection and response (XDR) solutions, and together we will have the opportunity to support our clients further to address current cyber threats. It is becoming increasingly clear that cyberattacks are on an upward trend, including in Romania, and companies need services and solutions that shift them to proactive cyber defense to better protect them against these threats. Our team is specialized in the solutions provided by Fidelis Cybersecurity, and this alliance, will significantly increase the company's turnover and help attract new clients," stated Victor Gânsac, CEO of Safetech Innovations.

By partnering with Fidelis Cybersecurity, Safetech Innovations will be able to deliver Active XDR solutions, which integrate deception technologies with detection and response across cloud, network, (NDR) and endpoints (EDR). Deception technologies enable security teams to dynamically reshape the attack surface and lure, detect and defend earlier in the attack cycle.

Fidelis solutions are provided through the Fidelis Elevate XDR platform, specifically designed for proactive cyber defense and to help Safetech's SOC (Security Operations Center) analyst teams combat cyberattacks as early as possible. Fidelis Elevate provides contextual visibility and asset discovery across the IT environment of a company. They can quickly detect and block attacks before they cause damage to target organizations. And SOC analysts can perform deep inspection/analyses of the environment to assess whether any systems have been compromised, and return impacted systems to normal business operations as quickly as possible.

With this partnership, Safetech Innovations expands its cybersecurity portfolio and strengthens the company's ability to provide SOC services through STI-CERT. Safetech has owned and operated a specialized security incident response center (CSIRT) since 2015, called STI-CERT, which provides clients in the public and private sectors with specialized services for monitoring cybersecurity threats and responding to security incidents 24/7 or 8/5 regime.

Safetech Innovations is listed on the AeRO market of the Bucharest Stock Exchange as of January 29, 2021. From October 2021, SAFE shares are included in the BET- AeRO index developed by the Bucharest Stock Exchange for the AeRO market.

About Safetech Innovations

Established in 2011, Safetech Innovations (SAFE) is currently the only dedicated information security company on the Romanian market, specialized in cybersecurity and implementation of cybersecurity solutions. Safetech Innovations' services include data protection, identification of vulnerabilities and risks, implementation of cybersecurity solutions and measures, response to cybersecurity incidents through STI CERT - Safetech Cyber Security Incident Response Center, and creation of an organizational culture oriented towards safety. The company has a broad portfolio of clients, having worked with more than 10 key institutions from the local financial banking sector, international players, as well as local companies from the energy, FMCG, telecom, IT&C and transportation sectors. Safetech Innovations (SAFE) is listed on the AeRO market of the Bucharest Stock Exchange market. Since October 2021, the company is included in the BET-AeRO index of BVB. www.safetech.ro.

About Fidelis Cybersecurity

Fidelis Cybersecurity, the industry innovator in Active XDR and proactive cyber defense solutions, safeguards modern IT environments with unparalleled detection, deception, response, cloud security, and compliance capabilities. We offer full visibility across hybrid environments via deep, dynamic asset discovery, multi-faceted context, and risk assessment. These features help minimize attackable surface areas, automate exposure prevention, threat detection, and incident response, and provide the context, accuracy, speed, and portability security professionals need to find and neutralize adversaries earlier in the attack lifecycle. Fidelis Cybersecurity is dedicated to helping clients become stronger and more secure. Fidelis is trusted by many top commercial, enterprise, and government agencies worldwide.
